

E302 Rocket Release

Product Description

E302 is extremely versatile, it is considered to be the "most paintable" release agent available when molding plastics and similar materials. Provides a long lasting anti-stick film for fast, easy part removal from molds and multiple part releases per application. Improves molding efficiency in many processes including pour cast polyurethane and foam, injection molding and vacuum forming.

Advantages:

- Allows molded parts to be painted, plated, hotstamped, adhesive bonded, labeled, or otherwise decorated in most applications.
- Improves parts appearance and reduces defects caused by sticking.
- Colorless and non-staining.
- A light coating produces the best results.
- Meets FDA regulation 21 CFR 184.1400 as a release agent in the manufacture of food contacting materials.
- Available in bulk as **Release #76**

Things to Note:

- May not get as many castings out of your silicone mold compared to E236.
- Can leave a matte finish on the castings.

Directions for Use

Shake well. Hold can 10 to 12 inches from mold surface. Apply a thin mist coating on mold surface for best results. Recommended for use on molds with surface temperatures below 250°F.

E302 Rocket Release Technical Data

Active Ingredients Proprietary food grade mold release.
Flammability Rating Non-flammable aerosol
Paintability Parts are easy to paint, decorate or glue.
