

## ZIP ME-301S Pattern Release Mold Release

### Product Description

ZIP ME-301S is silicone free and functions as an excellent pattern release for Silicone to silicone applications. Works well with BJB's Tin and Platinum based silicones. It is stable up to 350°F (177°C), and will provide long lasting release properties under this temperature.

### Advantages:

- Keeps silicone cast from sticking to other silicone.
- Saves time by allowing molded parts to be removed quickly and easily from molds.
- A light coating produces the best results.
- FDA and USDA approved liquid petrolatum.
- Colorless and non-staining.

### Things to Note:

- Over spraying may cause inhibition in the silicone.

### Directions for Use

Shake well. Hold can 8 to 10 inches from pattern. Apply a thin coat. For best results, do not over-spray.
